# Mock Object

- Has the same interface as the object it mocks

  - Interface

  - Subclass

- Can return canned results

- Can set up expectations and verifications

# TaskListInterface

- Create a new Interface with the methods from TaskList

  - « Extract Interface » is extremely useful

- Make TaskList conform to the Interface

  - Change the property on the TaskController

# Mock Object

- Has the same interface as the object it mocks

  - Interface

  - Subclass

- Can return canned results

- Can set up expectations and verifications
